

BiGuard SSL VPN Tunnels Upgrade Licenses Guidelines

Important Notes:

1. Each item of a BiGuard SSL VPN Tunnel Upgrade License is limited only to the applicable product model used. The number of SSL VPN tunnels available for upgrade is also limited to the upgrade range and eligible product model as stated in the description.
2. Existing BiGuard SSL VPN users need to purchase a BiGuard SSL VPN Tunnels Upgrade License with a printed "License Key" from a local vendor in order to increase the number of SSL VPN tunnels for the BiGuard SSL VPN device used.
3. The SSL VPN Tunnel Upgrades Package is available in electronic PDF format via download. Alternatively, the printed-paper license pack is available at a surcharge.
4. The package includes the "BiGuard SSL VPN Tunnel Upgrades License", "End User License Agreement", and "User's Guide".
5. Prior to entering the 'License Key' on the configuration page of the BiGuard SSL VPN device used for the tunnel upgrade, the user needs to install new firmware on the BiGuard SSL VPN device in order to enable the device for future's SSL VPN tunnel increases. The firmware for the SSL-VPN-tunnel-upgrade is available through the BiGuard Users Club at www.biguard.com, which is accessible by BiGuard SSL VPN users only.
6. Billion's authorized distributors are recommended to go to www.biguard.com and place a "Purchase Request" on tunnel upgrade licenses for fastest delivery.

Applicable Models

Item	Product Line	Applicable Models	Upgrade License Order Part Number	Description	Upgrade Options
