BiPAC 4300MR

4G LTE MiFi Router

The BiPAC 4300MR 4G LTE MiFi router acts as a portable mobile WiFi hotspot which supports the 2.4GHz WiFi frequency band and is compatible with IEEE 802.11 b/g/n standards. By inserting a SIM card, the router can connect to the internet and provides robust connectivity. The BiPAC 4300MR runs on multiple LTE bands, providing a peak download rate of up to 150Mbps and allowing simultaneous Internet access for up to 10 devices including laptops, smartphones, tablets, multimedia players and game consoles, etc.

The MiFi Router is equipped with a 1.44-inch LCD to intuitively show connection and battery usage status and a 2100-mAH durable battery that users can enjoy unsurpassed internet browsing experience all day long.

- Plug and play, Insert SIM card to access internet easily via Wifi.
- Multiple bands support.
- CAT-4 LTE with peak download rate to 150Mbps.
- 1.44 inch LCD show connections and battery status.
- 2100 mAh battery to supply all day internet browsing.

Features & Specifications

Network Types

- 4G FDD-LTE

Frequency

- FDD-LTE: B1/B3/B7/B8/B20
- TDD-LTE: B40
- WCDMA: 900/2100
- GSM: 900/1800

Button

- ON/OFF, WPS, Reset

Dimension

- 93.3x59x14.4mm, Weight: 85g

OS

- Support Windows 2000 / XP / Vista / Win 7/Win 8 / Mac, Android

WiFi

- IEEE 802.11 b/g/n 2.4G

Speed Input / Output

- Peak Downlink speed up to 150Mbps and Uplink speed up to 50Mbps (Category 4) 100V~240V 50Hz~60Hz / 5V DC±10%

Battery / LCD

- 2,100 mAh / 1.44"LCD
